2021-2022 testimonials

Emiko Haneda, Japan

Columbia Business School, *Digital Marketing*

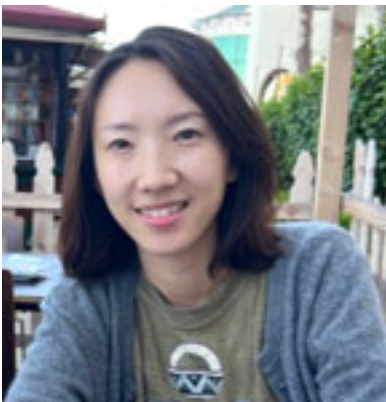

Thank you very much for giving me an opportunity to learn new things. This is the first time for me to take a professional class in the US. I was so inspired by new marketing trends in America. It will be very beneficial for me when I bring what I learned to my NPO in the future after my husband graduates from Stanford.

Fernanda Ferreccio Palacios, Chile

Stanford Continuing Studies, *Introduction to Data Science in R*

I'm a lawyer, so I do not have a very strong quant background. For that reason I took this Data Science in R course. I am really thankful for the grant since it allowed me to take this course. To suspend my personal plans for the good of my marriage was not easy, but being able to develop myself in this time was really helpful to not consider this year as a lost year professionally speaking. I hope you can continue with this initiative so more people can benefit from this!

JooYoung Kim, South Korea

COURSERA *Google data Analytics Professional Certificate*

Thank you very much for giving me the opportunity to learn and study. It...was difficult to keep up with my career because of my current visa status and limit of budget. This grant motivated me to study again so I've taken the course every day after my four years old daughter goes to bed. Learning data analytics is very interesting and it will definitely be beneficial for my future careers.
